

Please stop the tax cuts, which are starving needed public programmes of funding. Tax cuts are intended to destroy government and increase income inequality and should be stopped. I am happy to pay taxes to get good services.

Balancing the budget should be done with small tax increases and clawing back money from tax avoiders where necessary.

We need better funding of regulatory bodies in many areas, to protect the environment and to protect citizens and consumers. We must stop the deregulation and destruction of protections for Canadians. The trade deals that Canada is negotiating must be opened to public scrutiny.

Sincerely
James Wright
